## Wooden Inline Ocarina Fingering Chart

### Tenor F4 Model

Accidentals\*

Diatonic Scale

#### Notes

\* There are many alternative fingerings possible for accidentals (as well as the main diatonic scale). The fingerings shown are only suggested, but other combinations are possible, and there may be some slight variations between models due to the voicing process. For example, in both the cases for the high F#5 and high G#5, you can use the right index finger instead of the left, as the hole sizes are typically very close in diameter.
